

Overview

TendersHub is a new **business-to-business portal** and platform that connects businesses in Lebanon, Bahrain, Iraq, Jordan, KSA, Kuwait, Oman, Qatar and UAE through a wide online social hub.

The **user-friendly website** allows certified service providers and suppliers to fill out their portfolios and post them in a buzzing network of individuals, contractors, developers and enterprises.

By eliminating paperwork and neutralising human interference, competition is encouraged while the market is at its peak.

TendersHub

Connecting Business

Features

TendersHub brings together all the components of a successful business endeavour:

Connectivity

is key and a 24hr support team is available to make sure you are online. Social media networks across Facebook, LinkedIn and Twitter are there to set your work in motion and widen your reach.

Transparency

means equal opportunity in our books. Bids are open to the public while tenderers and bidders IDs are sealed until the bid is closed – no favours, no bribery, and no human interference.

Exposure

to opportunities initiated by a network of professionals. Published portfolios and catalogues showcasing some of the best work in the industry are solid promotional tools in our Hub.

No Commission Policy

on TendersHub members. You will enjoy a zero commissions' policy whether you are a tenderer or a project owner.

Speed

of instant quotations and automatic sorting (cheapest to most expensive) renders decision-making clearer and more efficient. Projects are created in just a few clicks and will reach your target audience as soon as they are published.

Membership

The TendersHub community consists only of certified professionals with a proven track record of successful undertakings. To ensure an ideal ecosystem for thriving business endeavours, TendersHub reserves the right to approve requested memberships.

The TendersHub client base includes:

Tender A Project

STEP I Create A Project

To create a new project, click on "Post New" from the navigation bar and enter your project's details

Price

Setting a price range will help tenderers get acquainted with the expected budget and try to limit their estimates accordingly.

Location

The project location is an important factor in estimating the costs and therefore it is important to give the tenderers this information.

Description

A short description of the Project to give tenderers an idea about what is expected from them.

Tags

Listing areas of interest so that this Project gets tagged accordingly.

Deadline

Setting a deadline for tenders will ease the tender management process and ensure all tenderers are given an equal opportunity.

Title

A clear and concise title that would give potential tenderers an idea about the project.

Category

Choosing the respective category of the project to get quotes only from related tenderers.

Your project title:

STEP III Publishing

Project creation is successful. TendersHub points payment made. You will now need to wait for the Admin's approval so that tenderers start bidding.

And when you go back to your account page, your history will be listed as per the below categories for ease of reference:

Recent Closed Projects

Projects that were recently published and now closed for tenders after the deadline has been met.

Recent Tenders

List of your latest unsuccessful tenders.

Published Projects

As soon as your project is published, related members will be invited via email to bid on your project, a post announcing your project will be shared on our social media channels (Facebook, Twitter and LinkedIn) and an RSS feed is generated.

Recent Awarded Projects

are your successful tenders that were awarded.

My Unpublished & Unpaid Projects

Projects that were not published due to the absence of payment or admin approval.

Recent Posted Projects

The Latest Projects created and published.

Recent Posted Projects

Create Your Profile

Post A Project

Tender A Project

Members interested in tendering a project can do so by **entering their bids, time for completion, and attaching supporting documents**. The project owner's ID remains hidden until the project's deadline is met and tenderers can remain anonymous using the **sealed bid option**. As soon as a tenderer's bid is successful, a notification via email will be sent and only then the project owner's ID be revealed to the tenderers.

Responsive Website

The website is adaptable to multiple display sizes and devices (tablets, phones and desktops). With this option you can post or tender projects from anywhere at anytime!

Advertising

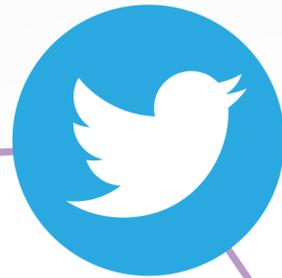

Suppliers and service providers have the option to advertise with us and reach out directly to their target audiences on the social media networks.

Internal Messaging System

An internal messaging system is integrated on the website to give you the capacity to communicate quickly and securely with other members of the site.

Social Media

A published project is automatically shared across our social media networks and the more interactive you are, the more opportunities you will create. Suppliers and service providers have the opportunity to advertise with us and reach directly to their target audiences.
